

Heating Condition of abalone for exemption of Health Certificate

Disease	Heating condition
Infection with Abalone Herpesvirus (AbHV)	a. heat sterilized hermetically sealed abalone products (i.e. a heat treatment at 121°C for at least 3.6 minutes or any time/temperature equivalent); b. mechanically dried abalone products (i.e. a heat treatment at 100°C for at least 30 minutes or any time/temperature equivalent which has been demonstrated to inactivate AbHV)
Infection with Xenohalotis Californiensis	a. heat sterilised hermetically sealed abalone products (i.e. a heat treatment at 121°C for at least 3.6 minutes or any time/temperature equivalent)

※ The above heating conditions of abalone are based on Section 9 in OIE Aquatic Animal Health Code
